

## List of Contents

### NUMBER 1

- |   |    |  |
|---|----|--|
|   | i  | Softstrip® data strip containing the table of contents for this issue  |
| <b>DeLos F. DeTar</b>   | 1  | Procedures for defining FSE standards  |
| <b>J. B. Drake, A. K. Hudson,<br/>E. Johnson, D. W. Noid,<br/>G. A. Pfeffer and<br/>S. Thompson</b> | 15 | Molecular dynamics of a model polymer on a Hypercube parallel computer   |
| <b>Mitsuo Murata</b>  | 21 | An efficient algorithm for comparing two protein sequences: implementation for microcomputers  |
| <i>Applications Section</i>   |    |  |
| <b>Eric F. Brown</b>  | 27 | Analyzing the oxidation of graphite using a microcomputer  |
| <b>Marijan Miletic, Ivan Kobal<br/>and Teodor Mohar</b>   | 39 | Computerized tritium measurements with a liquid scintillation counter  |
| <b>Kurt Kalcher,<br/>Herbert Greschonig,<br/>Christian Jorde and<br/>Alfred Leitner</b>             | 43 | A program system for spectroelectrochemical measurements   |
| <b>Brian Clarke</b>   | 65 | A molecular graphics suite of programs for a micro-computer to display molecules from Cambridge Crystallographic Data Files and the alpha-carbon backbone of proteins from Protein Data Bank crystal files |
| <i>Book Review</i>  |    |  |
| <b>DeLos F. DeTar</b>   | 83 | Similarity and Clustering in Chemical Information Systems, by Peter Willett  |

### NUMBER 2

- |   |    |  |
|---|----|--|
|   | i  | Softstrip® data strip containing the table of contents for this issue  |
| <b>Carlos F. Bunge and<br/>Gerardo Cisneros</b>   | 85 | Modular libraries and literate programming in software for <i>ab initio</i> atomic and molecular electronic structure calculations   |
| <b>Carlos F. Bunge,<br/>Annik Vivier Bunge,<br/>Gerardo Cisneros and<br/>Jean-Pierre Daudey</b> | 91 | New algorithm and FORTRAN module to carry out the four-index transformation of atomic and molecular physics wholly in central memory |

<b>Carlos F. Bunge, Annik Vivier Bunge, Gerardo Cisneros and Jean-Pierre Daudey</b>	109	V4ITD: a portable and efficient FORTRAN implementation of the 4IT algorithm using virtual memory and an external storage device
<b>Gerardo Cisneros, Carlos F. Bunge, Annik Vivier Bunge and Jean-Pierre Daudey</b>	141	E4ITD: a general FORTRAN implementation of the 4IT algorithm
<b>D. Cabrol, J. P. Caire et P. Ozil</b>	165	L'utilisation du langage Prolog pour la décomposition des grands procédés chimiques
<b>V. M. Miskowski, M. Albin, M. D. Hopkins, D. E. Brinza and H. B. Gray</b>	171	Franck-Condon analyses on the IBM PC/AT
<b>David J. M. Park Jr</b>	175	Positive compositional algorithms in chemical reaction systems
<i>Application</i> <b>Heikki Joela</b>	189	A microcomputer program for second-order simulation of EPR spectra

### NUMBER 3

- i Softstrip® data strip containing the table of contents for this issue

<b>Carl W. David</b>	207	Voronoi polyhedra as structure probes in large molecular systems—VII. Channel identification
<b>Iwao Fujita</b>	209	Automatic analytical differentiation for nonlinear least-squares calculations
<b>A. Muñoz de la Peña, J. A. Murillo, J. M. Vega and F. Baringo</b>	213	Development of a low-cost interface for coupling a microcomputer with a fluorescence spectrophotometer. Computer-assisted fluorimetry
<b>Peter Senn</b>	219	The computation of the distance matrix and the Wiener index for graphs of arbitrary complexity with weighted vertices and edges
<b>Carl W. David</b>	229	Variational calculations on a correlated helium wave function using MAPLE
<b>P. Badziag and F. Solms</b>	233	An improved SCF iteration scheme
<b>E. Wigderson and A. Y. Meyer</b>	237	Intramolecular voids and intermolecular channels
<b>A. C. Norris and A. L. Oakley</b>	245	Electronic publishing and chemical text processing—I. A survey of software for two-dimensional chemical structure editing

- A. C. Norris and A. L. Oakley** 253 Electronic publishing and chemical text processing  
—II. Character and vector representations of chemical structures

*Applications*

- J. M. Rodriguez Mellado, M. Blazquez and M. Dominguez** 257 A curve-fitting program set for handling of differential pulse polarograms
- T. Förster, B. Atzberger and C. W. v. d. Lieth** 267 CONTAB—a program for connection table generation from linear input

**NUMBER 4**

- i Softstrip® data strip containing the table of contents for this issue

- J. P. Gastmans, V. E. de Paula et M. Furlan** 285 Etude par microordinateur de l'influence des atomes voisins sur les signaux RMN de  $^{13}\text{C}$

- Joseph Chrastil** 289 Determination of the first order consecutive reaction rate constants from final product

- Jaroslav Kostrowicki, Adam Liwo and Krzysztof Sokolowski** 293 A comparative study on some methods for computing equilibrium concentrations

- F. T. Chau and K. D. Chan** 301 A computer-based temperature measurement system

- Concetta De Stefano, Pietro Princi, Carmelo Rigano and Silvio Sammartano** 305 The calculation of equilibrium concentrations. ESTIME: a computer program for comparing execution times on different machines

*Applications*

- H. S. Tan, P. Chiarot and W. E. Jones** 317 Microcomputer-assisted temperature programmed desorption studies

- S. Lago and C. Vega** 343 A generalization for mixtures of a fast algorithm to calculate some intermolecular orientational averages

*Note*

- Tom Nicol** 357 Performance of the HQR11 diagonalization routine

*Book Review*

- DeLos F. DeTar** 359 The Visual Display of Quantitative Information, by Edward R. Tufte
